

Spreading the STEM Ideology

MDEC and PINTAR talks Digital Innovation with kids

The Malaysia Digital Economy Corporation (MDEC) and the PINTAR Foundation, rolls out a new mobile learning unit under initiative with the mission of creating exposure and opportunities to digital education for some 100,000 students in rural, sub-urban and underprivileged schools.

This new mobile unit is supported by the Ministry of Education Malaysia, and it aims to expose students, teachers, parents and local communities

in rural Malaysia to new digital making content and tools.

"To echo our Prime Minister at the launch of #mydigitalmaker last year, we want to mobilise this generation of young people with the drive, confidence and know-how, so that they can be the 'makers' of their own technology and innovations we have yet to imagine.

"The 'Kembara #mydigitalmaker bersama PINTAR' is a brilliant continuation of this national ICT-education initiative, and the Ministry

of Education applauds this joint effort between MDEC and PINTAR Foundation for exposing to students and educators all over Malaysia to similar opportunities." says Dato' P Kamalanathan, Deputy Minister 1, Ministry of Education Malaysia at the launch ceremony at SMK Kompleks KLIA, a #mydigitalmaker Model School.

PINTAR's mobile unit will be travelling around Peninsula Malaysia until the end of the year.
